

**Amendments to the Specification:**

Please replace the paragraph on page 17, lines 8-15 with the following amended paragraph:

Upon the occurrence of a calendar-related event, determination operation 902 determines whether a predetermined notification mode has been set for the event. In one embodiment, the user may set a particular notification mode for an event when the event is created and/or edited. Alternatively, the user may associate notification modes with calendar events independently of the creation or editing of the calendar events. If determination operation 902 determines that no predetermined notification mode has been set for the particular calendar event, ~~flow~~flow branches NO to end operation 908. In such a case, the notification mode is not changed and any subsequent notifications are presented to the user according to the existing notification mode.
